Argirelin 阿基瑞林

主要治疗：可有效舒缓抑制细纹及皱纹周边肌肉的收缩与活动

## ARGIRELINE

Argireline is a kind of anti-wrinkle peptide, it adopted a unique facial tension relaxation mechanisms play a role, which reduce the surface wrinkles on the face. In the products, Argireline content from 0.0015-0.005%. Published in international scientific journals cosmetics periodicals (International Journal of Cosmetic Science). In a study on the oil / water emulsion used in the concentration of 10%, results showed that a 30-day course of treatment, wrinkle depth reduced by 30%

Anti-wrinkle peptide (Argireline) can reduce wrinkles caused by facial expressions muscle contraction and prevent catecholamine-induced facial skin aging, but also as a variety of emulsion, gel formulations of cosmetics ingredients to conduct a comprehensive conditioning, the activation of dermal skin cells, reduce wrinkles

Janson Beckett AlphaDerma, this product really caused a sensation. 10% ARGIRELINE (47.60 peptides), the so-called Class of botulinum, expression profiling of the most effective elements, in general care products rarely used (except HR and EA), Janson Beckett not only spent, which can also use imposes the greatest concentration, they also added ALA, DMAE, and the latest anti-aging ingredients, VC, and the old components COLLAGEN did not miss, which makes us totally believe this is amazing effective products.
