## GHK-Copper (Cu)

This product is highly recommended by USA dermatologists, has functions of reversing skin age, skin renewal, scarless healing, and removal of skin lesions with high safety. It is used as active ingredients in cosmetics production. GHK Copper peptide is useful in anti-aging products and wrinkle treatment products such as gels, serums, lotions and creams. And has promising market demand.

1986 in Washington, DC, the establishment of ProCyte Corporation, will be committed to working with copper Bond amino acid applied for human tissue repair, aging, wrinkles and scalp hyperplasia treatment. So in 1999 the establishment of NEOVA brand, officially Blue rhytidectomy copper used in aging beauty maintenance. Many dermatologists' physicians also published articles reporting clinical human experiment confirmed that this complex can play into the dermal layer effects. So dermatology and plastic surgeons recommend for the 21st century least stimulated aging wrinkle products.
